

Yang I. Pachankis

Subjects: **Psychology**

Contributor: Yang I. Pachankis

- cosmology
- black hole
- white hole
- high energy physics
- nuclear science
- macroeconomy
- artist
- psychoanalysis
- human rights

Basic Information

Name: Yang I. Pachankis
(May 1987–)

Birth	Chongqing, PRC
Location:	
Titles:	Cosmologist Artist Human rights activist Film director Film editor Psychiatrist Psychoanalyst Astrophysicist Reverend
Affiliation:	Communication University of China
Honors:	Best Editing in the Asians on Film Festival 2015 Standout Entry in 2021 & 2023 NASA Data Challenge

1. Introduction

Rev. Yang I. Pachankis was ordained by the Universal Life Church with the birth name Yang Cao ^[1]. By *stare decisis*, he entered the religion-based marriage with John E. Pachankis and Greg E. Dufner ^[2]. Apart from his non-heterocentric theological insights in Christianity, Yang contributed to cross-disciplinary research findings and public causes.

Human Rights Activist

Being born in People's Republic of China (PRC) with constitutionalized structural dictatorship, Yang devoted his early aspirations in human rights and infused them in his art practices. He was democratically elected one of the four directors in his B.A. graduation co-production in 2009, and successfully led his class in producing the short film *The Lithosporic* to advocate for female-to-male transgender rights in the patriarchic society ^[3]. Later after graduation, he created the video art work *Soiled Tattered Tissue* in evidencing with quantum chromodynamics

technique and in communicating on the proliferation issues in Beijing, and the work was exhibited in Amsterdam, the Netherlands ^{[4][5][6]}.

Apart from the continued art creation from the everyday life observations and research in democratization, Yang Pachankis investigated on the systemic and institutional crimes upon the COVID-19 outbreak ^{[1][7]}. His activism combines social science field research and research in medical sciences, and actively communicates the autoimmune disease pathogen and progresses in remedy solutions in the academic community ^{[8][9][10]}. His field researches expose the astounding issues in the public health system in PRC that have surpassed the mere concerns in the transgressions of people's right to health ^{[11][12]}.

Astronomical Scientist

Yang Pachankis developed the theory on black hole and white hole thermonuclear binding during high school studies, and managed to obtain the empirical evidence with a series of experiments conducted in 2020 and 2021 ^{[1][13]}. His data processing took into consideration a range of modern quantum physics applications in data and computing, and actively proposes concepts for instrumentation designs ^[14]. He managed to make the first observations on white holes with Harvard-Smithsonian MicroObservatory and processed the evidence for the fifth cosmic force with the multi-mission space-based telescopes ^{[15][16][17]}. His astronomical research was conducted under constant harassments from the People's Liberation Army and systematic institutional violence under the PRC dictatorial regime ^{[1][18][19]}.

Psychoanalyst & Psychiatrist

Yang Pachankis is a member of the European Psychiatric Association. He takes an anthropological approach to psychoanalysis, and the environmental determinants have shaped his psychiatric perspectives ^[20]. Yang's psychoanalytic approach offers insights from sociostructural sampling and has significance in public mental health preservation from ideological intrusions ^{[9][21]}. His psychodynamic approach is Christian value orientated with theological insights. He regards Moses as the Christian prototype of a dictator, who "claimed the lordship as God" and "God never put sins on sex in the beginning" ^[22]. He is actively working in bridging psychology with psychiatry from a naturalism philosophical perspective with the nucleon element ^{[23][24][25]}.

Filmmaker

Yang has edited a score of feature films and TV series in PRC ^[26]. The quality of his editing has been witnessed by the industry with film awards to the works ^[27]. He was personally awarded Best Editing in the Asians on Film Festival 2015. Contributed by the censorship in PRC, only *The Lithosporic* from Yang's rare director works received phenomenal acclaim from LGBTQIA⁺ film festivals nationally and internationally ^[28].

2. Institutional Education

- 1994 - 2000 Chongqing Hanwei Road Primary School

- 2000 - 2006 Chongqing No. 2 Foreign Language School
- 2006 - 2010 B.A. Directing (Editing Art & Technology), School of Drama, Film and Television, Communication University of China
- 2015 - 2020 Master of Business Administration, School of Economics and Management, Communication University of China

Yang Pachankis started independent research during his graduate dissertation research in Communication University of China in 2017, contributed by the dictatorial controls on the academic board before consolidating power through constitution change ^[29]. He followed suit upon the Sino-America Trade War rightly after Donald Trump's first visit in Beijing, while counteracting human trafficking and military-intelligence surveillance ^{[30][1]}. It was only after the publication of his completed theses and research findings in 2022, Yang Pachankis was retrospectively acknowledged by the international academic community Masters & Ph.D. in global governance, cosmology. ^{[31][29]}
